In Italy, eni refining & marketing is the leading operator in the oil refining, distribution and service activities. It operates in the production, transportation and selling of a wide range of oil products, including gasoline, diesel fuel, jet fuels, lubricants, bitumens, asphalt, etc. The company has a strong presence in the Italian market and is one of the leading operators in Europe.

In 2012, the company’s refinery throughputs were 30.01 million tons. In the same period, refining of eni/agip refined products in Europe totalled 10.87 million tonnes. In the same period, refining of eni/refined products in Europe totalled 10.87 million tonnes. In the same period, refining of eni/gas & power refined products in Europe totalled 10.87 million tonnes.

The company’s refinery in Gela, operated by eni refining & marketing, is one of the largest refineries in Europe. The refinery produces a wide range of oil products, including gasoline, diesel fuel, jet fuels, lubricants, bitumens, asphalt, etc.

In 2012, the refinery throughput was 2.2 million tons.

In 2013, the refinery throughput was 2.3 million tons.

In 2014, the refinery throughput was 2.4 million tons.

The refinery is located in the southern Italian region of Sicily, approximately 100 km south of Palermo, near the town of Gela. The refinery is one of the largest and most modern refineries in Europe, with a total capacity of 2.5 million tons per year.

The refinery has a current capacity of 2.4 million tons per year and is capable of processing a wide range of crude oils, including light, medium, and heavy crudes.

The refinery is equipped with state-of-the-art technology and is designed to meet the highest environmental and safety standards.

The refinery produces a wide range of oil products, including gasoline, diesel fuel, jet fuels, lubricants, bitumens, asphalt, etc.

In 2012, the refinery produced 1.9 million tons of gasoline, 1.1 million tons of diesel fuel, 0.2 million tons of jet fuels, 0.1 million tons of lubricants, 0.5 million tons of bitumens, and 0.3 million tons of asphalt.

In 2013, the refinery produced 2.0 million tons of gasoline, 1.2 million tons of diesel fuel, 0.3 million tons of jet fuels, 0.2 million tons of lubricants, 0.6 million tons of bitumens, and 0.4 million tons of asphalt.

In 2014, the refinery produced 2.1 million tons of gasoline, 1.3 million tons of diesel fuel, 0.4 million tons of jet fuels, 0.3 million tons of lubricants, 0.7 million tons of bitumens, and 0.5 million tons of asphalt.
The Gela Refinery is situated on the southern coast of Sicily, in the town of Gela in the municipality of Gela and was opened in 1962 by the Italian oil company Agip Petroli. The refinery covers an area of 5 km² divided into “islands”.

The first production plant became operational in 1962, with a production capacity of 5 million tonnes of crude oil per year. The current processing capacity amounts to around 4.5 million tonnes of crude oil per year (the current processing capacity amounts to around 5 million tonnes of crude oil per year).

From 1992 to 2002, the Gela Refinery was part of the Agip Petroli circuit, which represented a valuable and important economic, social and cultural asset.

In December 2002, Agip Petroli transferred the company “Raffineria di Gela S.p.A.” as of 1st April 2003. The company continued to operate under the name “Gela Refinery” and was subsequently transferred to the company “Raffineria di Gela S.r.l.” on 1st January 2003 and which later became “Piperay S.p.A.”, a company of the eni Group in 2008.

The first production plants became operational in 1962, with a production capacity of 3 million tonnes of crude oil per year (the current processing capacity amounts to around 5 million tonnes of crude oil per year).

In 2012, eni’s refinery in Gela was awarded the environmental sculpture “Il cigno d’oro” that represents the excellence of the company’s environmental management. This is the highest quality certification for the environmental management system.

The commitment to operate responsibly and promote a model of sustainable development is part of the tradition and values of the Gela Refinery. Our sustainability strategy is fully integrated into the business model and encourages projects and initiatives to meet the increasingly diversified and constantly evolving needs of the stakeholders. We focus our attention on certain areas of particular importance: the protection of the environment and natural resources, the protection of the health and safety of our staff, the enhancement of the local area, and the ongoing search for a mutually beneficial and harmonious relationship with local communities. The management and development of human resources in the Gela Refinery follow the model and set of principles on which its own business organization is built, in particular compliance with the health, safety and environment policy (HSE).

The refinery follows the guidelines set out by regulate health and safety at work, the European Union's minimum standards regarding the health of its employees as well as those of the corresponding national laws, the protection of the environment, the prevention of accidents and the protection of the health of workers, contractors and all those who come into contact with the company. The Gela Refinery stands as a major player in spreading networks of excellence and promoting research and innovation. Our corporate sustainability strategy focuses on economic interventions that can bring about long-term benefits for the area and on economic interventions that can bring about long-term benefits for the area and on economic interventions that can bring about long-term benefits for the area and on economic interventions that can bring about long-term benefits for the area and on economic interventions that can bring about long-term benefits for the area.

In terms of health, the founding principles at the Gela Refinery are:

- to prevent occupational accidents and diseases;
- to protect the health of workers, contractors and communities;
- to comply with those principles on which its own business organization is built, in particular compliance with the health, safety and environment policy (HSE).

The Gela Refinery follows the guidelines set out by regulate health and safety at work, the European Union's minimum standards regarding the health of its employees as well as those of the corresponding national laws, the protection of the environment, the prevention of accidents and the protection of the health of workers, contractors and all those who come into contact with the company.

In line with eni’s policies and guidelines, as part of its Environmental Management System, the Gela Refinery has defined an Environmental Management System (EMS) and Safety Environment Management System (EMS) and Safety Environment Management System. In line with eni’s policies and guidelines, as part of its Environmental Management System, the Gela Refinery has defined an Environmental Management System (EMS) and Safety Environment Management System (EMS) and Safety Environment Management System.
