Mission

We are an energy company.

We concretely support a just energy transition, with the objective of preserving our planet and promoting an efficient and sustainable access to energy for all.

Our work is based on passion and innovation, on our unique strengths and skills, on the equal dignity of each person, recognizing diversity as a key value for human development, on the responsibility, integrity and transparency of our actions.

We believe in the value of long-term partnerships with the Countries and communities where we operate, bringing long-lasting prosperity for all.

The mission represents more explicitly the Eni’s path to face the global challenges, contributing to achieve the SDGs determined by the UN in order to clearly address the actions to be implemented by all the involved players.

Global goals for a sustainable development

The 2030 Agenda for Sustainable Development, presented in September 2015, identifies the 17 Sustainable Development Goals (SDGs) which represent the common targets of sustainable development on the current complex social problems. These goals are an important reference for the international community and Eni in managing activities in those Countries in which it operates.

Disclaimer

Eni for 2020 is a document published on a yearly basis which contains certain forward-looking statements related to the different topics covered therein. Forward-looking statements are based on Eni management’s reasonable assumptions and belief in light of the information available to them at the time the statements are made. Nevertheless, by their nature, forward-looking statements involve a component of uncertainty as they relate to events and depend on circumstances that may or may not occur in the future and which are, in whole or in part, out of Eni’s control. Actual results, also with reference to the targets and objectives identified in the strategic planning or those of Corporate Governance, may differ from those expressed in such statements, depending on a variety of factors, including without limitation: the impact of the pandemic disease (COVID-19); the fluctuation of the demand, the offer and the pricing of oil and natural gas and other oil products; the actual operational performances; the general macroeconomic conditions; geopolitical factors and changes in the economic and regulatory framework in many of the Countries in which Eni operates; the achievements reached in the development and use of new technologies; changes in the stakeholders’ expectations and other changes to the business conditions. The readers of the document are therefore invited to take into account a possible discrepancy between the estimates reported and the results that may be achieved as a consequence of the occurrence of the above. Eni for 2020 also contains terms such as, for instance, “partnership” or “public/private partnership” used for convenience only, without a technical-legal implication. “Eni” means the parent company Eni SpA and its consolidated subsidiaries.
ENI FOR 2020 - A JUST TRANSITION
Committed in the present to build the future

In this document, Eni wants to describe its contribution to a just transition, an energy transition that allows to give access to energy for all and to protect the environment, while being socially fair. Eni for 2020 recounts Eni’s path to meet these challenges, which are now even harder following the health emergency that began in 2020. Eni for explores Eni’s business model and in particular Operational Excellence, i.e. the enabling factors for achieving strategic objectives, as well as the importance of our Alliances for Development for creating value in the Countries where Eni operates. Eni for also includes two annexes, one detailing the path towards “Carbon Neutrality by 2050” and one dedicated to the Sustainability performance over the last 5 years, with related comments.

Each of us is called upon to play an active part in the transition process, to build a more sustainable future for tomorrow’s generations. Businesses are organisations of economic, financial and technical resources, but also and above all of human resources. Values such as respect for human rights, transparency, entrepreneurial spirit, a drive for innovation and the courage to go against the grain have characterised our company and are still the basis for our growth as a business. Our company is making a crossing, exposing ourselves to waves that we are now able to navigate safely. In this journey ahead, we are all called to act responsibly. Each of us plays an important role and must be at the service of others, working with and for others, creating a virtuous circle that unites all stakeholders and therefore achieves the just energy transition that we desire.

Claudio Descalzi
Chief Executive Officer
TOWARDS A JUST TRANSITION: ENI’S BUSINESS MODEL

Eni’s business model is aimed at creating value for all stakeholders, through a strong presence along the entire energy value chain. Eni aims to contribute, directly or indirectly, to the achievement of the Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda, supporting a just energy transition, which responds with concrete and economically sustainable solutions to the challenges of combating climate change and giving access to energy in an efficient and sustainable way, for all. Eni organically combines its business plan with the principles of environmental and social sustainability, extending its range of action along three lines: 1. operational excellence; 2. carbon neutrality by 2050; 3. Alliances for development.

VALUE CREATION FOR STAKEHOLDERS
Through an integrated presence all along the energy value chain

OPERATIONAL EXCELLENCE
- Health, Safety and Environment
- Human Rights & Integrity
- Resilience and Diversification
- Capital discipline

CARBON NEUTRALITY BY 2050
- Life cycle GHG emissions approach (Scope 1, 2 and 3)
- Set of concrete actions for the entire decarbonisation of processes and products

INTERMEDIATE OBJECTIVES OF NET REDUCTION IN ABSOLUTE TERMS AND OF EMISSION INTENSITY

ALLIANCES FOR DEVELOPMENT
- Dual Flag approach
- Public-private partnerships
- Job creation and know-how transfer
- LOCAL DEVELOPMENT PROGRAMS IN ACCORDANCE WITH 2030 AGENDA

COMPETENCES
TECHNOLOGICAL INNOVATION AND DIGITALIZATION

Nationalities
People
Countries of presence

CARBON NEUTRALITY BY 2050

Eni’s business model provides for a pathway towards carbon neutrality based on an approach that looks at emissions generated throughout the life cycle of the energy products sold and on a set of actions that will lead to total decarbonisation of processes and products by 2050. Based on these principles, in 2021, the new strategy was defined to relaunch the operational objectives in the short, medium and long term, which outline the evolutionary and integrated path of the individual businesses and which will lead Eni to carbon neutrality by 2050, in line with the provisions of the scenarios compatible with keeping global warming within the 1.5 °C threshold. The speed of evolution and the relative contribution of the businesses will depend on market trends, the technological scenario and the relevant legislation. In particular Eni will pursue a strategy that aims to achieve by 2050 the net-zero target on GHG Scope 1+2+3 emissions (Net GHG Lifecycle Emissions), and the elimination of related emission intensity (Net Carbon Intensity), referred to the entire life cycle of energy products sold.

2020 MAIN RESULTS

GHG EMISSIONS

-26%  
Upstream Ghg Emission intensity index vs. 2014

-39%  
Volume of hydrocarbons sent for process flaring vs. 2014

-90%  
Upstream fugitive methane emissions vs. 2014 (target achieved)

11,4 MtonCO₂eq.  
Net carbon footprint Upstream (GHG emissions Scope 1+2) -23% vs. 2019

439 MtonCO₂eq.  
Net GHG lifecycle emissions (GHG emissions Scope 1+2+3 - on equity basis): -13% vs. 2019

68 gCO₂eq./MJ  
Carbon intensity (GHG Scope 1+2+3 emissions - on equity basis): ~ 2019

RESEARCH & DEVELOPMENT

€157 Millions  
Spese totali in ricerca e sviluppo nel 2020

of which 74 Millions  
in decarbonisation

OPERATIONAL EXCELLENCE

Eni’s business is constantly focused on operational excellence. This translates into ongoing commitment to the development of people through consolidation and evolution of skills to support the transformation process, to the protection of the health and safety of both people and asset integrity, and to the protection of the environment by promoting the efficient use of natural resources and the safeguard of protected areas relevant to biodiversity. Furthermore, Eni is committed to respecting and promoting integrity and respect for human rights in its activities and with the involvement of its stakeholders, with a focus on transparency and the anti-corruption in all its forms. These elements allow the company to seize the opportunities related to the possible evolutions of the energy market and to continue on the path of transformation.

ALLIANCES FOR DEVELOPMENT

The outbreak of the health emergency triggered an unprecedented crisis, affecting the poorest and most vulnerable people in the world the most, and hindering progress towards the SDGs. In 2020, Eni has increased its efforts towards a just energy transition that combines the need to reduce carbon footprint with the need for community development by enhancing resources in the Countries where it operates, allocating gas production to the local market, promoting access to energy and supporting the definition of Local Development Programmes (LDPs). To address the health emergency, Eni has taken immediate action, in collaboration with local authorities, to reorient local development projects to better meet primary needs of the most vulnerable populations. In order to meet development challenges, partnerships with international development cooperation agencies and organisations have become increasingly important as an effective lever to mobilize resources that are not exclusively economic and to contribute to the development of Countries.

2020 MAIN RESULTS

INVESTMENTS IN LOCAL DEVELOPMENT

€96.1 Millions
Investments in local development

PARTNERSHIP FOR DEVELOPMENT

COOPERATION AGREEMENTS
Signed with world bank, usaid and civil society organizations

ACCESS TO ENERGY

57 Billions of Sm³
Gas sold to domestic markets in 16 countries

100%
Gas sold to the domestic markets of 12 out of 16 countries

LOCAL DEVELOPMENT PROJECTS

9,445 Households accessing clean cooking technology

4,526 Students attending schools that were renovated and with services improved by Eni

SOMETHING IDENTIFIED IN 2020

SHORT-TERM TARGETS (2021)
Access to energy: 4,100 households accessing clean cooking technology Education: 6,180 students attending schools that were renovated and with services improved by Eni

MEDIUM-TERM TARGETS (2022-2024)
Access to energy: 11,300 households accessing clean cooking technology Education: 61,125 students attending schools that were renovated and with services improved by Eni

LONG-TERM TARGETS (2030 AND BEYOND)
Access to energy: Ensuring access to modern energy, in particular clean cooking, for local communities Education: Ensuring access to quality and inclusive education for students from local communities.

INVESTMENTS IN LOCAL DEVELOPMENT

€ 109.4 million invested in local development.

€ 243.9 million invested in local development.

Contributing to the promotion of development interventions for local communities.

Structure of the Local Development Programme

Eni supports Country Development Plans, including through public-private partnerships and by adopting internationally recognised standards, methodologies and tools.
Eni’s non-financial reporting

Through its non-financial reporting, Eni wants to proactively describe its role in the energy transition, sharing its values, corporate strategies, objectives and results achieved to date. For this reason, also aware of the increasing centrality of non-financial information, over the years Eni has developed an articulated reporting system with the aim of satisfying the information needs of its stakeholders in a complete and timely manner in terms of both variety and of level of deepening.

The 2020 Consolidated Disclosure of Non-Financial Information (NFI), prepared in accordance with the requirements of Legislative Decree 254/2016 (transposing European Directive 95/2014) and published in the Annual Report 2020, has the aim of clearly and concisely meeting the information needs of Eni’s stakeholders, further promoting the integration of financial and non-financial information. The NFI provides integrated reporting on the management model, policies applied, main risks and results related to environmental, social, personnel, human rights and anti-corruption issues.

Eni for 2020 - A just transition
Report that describes how, through the integrated business model, Eni creates long-term value, through the operational excellence model, alliances for local development and carbon neutrality by 2050.

Eni For 2020 - Carbon neutrality by 2050
In-depth analysis of governance, risk management activities, strategy and main Eni metrics and targets on climate change.

Eni for 2020 - Sustainability performance
This report, available only online, provides an overview of non-financial performance indicators along the three pillars of Eni’s business model.

Other reports
By June 2021 Eni will publish Eni for Human rights. Report describing Eni’s strategy on promoting and respecting human rights and reporting the main activities and performance indicators. In addition to these documents, Eni publishes other local sustainability reports on an annual basis, which will be available in the course of 2021 on the site For more information: eni.com

REPORTING PRINCIPLES AND CRITERIA
Eni for 2020 is prepared in accordance with the “Sustainability Reporting Standards” of the Global Reporting Initiative (GRI Standards) with an “in accordance Core” level of adherence and taking into account the 10 principles of the Global Compact. Eni for 2020 - Carbon Neutrality by 2050 is prepared in line with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). Moreover, for the first time, in line with the commitment to promote a complete and comparable disclosure, the metrics related to the Sustainability Accounting Standards Board (SASB) standard and the "core" metrics defined by the World Economic Forum (WEF) in the White Paper “Measuring Stakeholder Capitalism - Towards Common Metrics and Consistent Reporting of Sustainable Value Creation” were published (the latter already included in the Non-Financial Information). The reference tables related to the GRI standards, the TCFD recommendations, the SASB standards and the WEF metrics are available in Eni for 2020 - Sustainability Performance and on eni.com

For more information: Eni for 2020 - Sustainability performance (pp. 57-58)

EXTERNAL ASSURANCE
Eni for 2020 was also subjected to limited assurance this year by the same independent auditors who also audited the Consolidated Financial Statements and the NFI. In addition, GHG Scope 1 and Scope 2 emissions are also subject to a reasonable assurance by the same external auditing company (PwC), with the aim of guaranteeing an even greater solidity of these data having strategic relevance for Eni.

For more information: Eni for 2020 - Carbon neutrality by 2050 (pp. 56-59)
