Saasken

In February 2020 Eni made a new oil discovery on the **Saasken** Exploration Prospect in **Block 10**. This was the sixth consecutive successful well drilled by Eni offshore Mexico. According to preliminary estimates, the discovery may contain between **200 and 300 million barrels of oil in place**. A full re-evaluation of the field is ongoing after the drilling of the appraisal well in 2021.

Sayulita

In August 2021 Eni made an oil find on the **Sayulita** Exploration Prospect in **Block 10**, located just 15 km away from the previous oil discovery of Saasken. An intensive data collection has been carried out and a preliminary estimate indicates that the new find may contain between **150 and 200 million barrels of oil in place**.
