

Meetings and activities of the Sustainability and Scenarios Committee in 2021

In 2021, The Committee met 12 times.

During meetings, The Committee discussed the following macro-themes:

- Macroeconomic and energy scenarios (trend and forecast of the main drivers)
- Eni medium -long term plan
- Climate change and main trends after COP21 and actions target-related implemented by the signatory Countries
- Evolution and perspectives of low carbon technologies
- Evolution of Eni's carbon footprint (Scope 1,2 and 3) and comparison with peers
- Eni Sustainability's policies and reporting. Trends of key indicators.

Over the year, analysts of IEA (International Energy Agency) were invited to discuss specific issues related to energy scenarios with particular regard to transition processes.
