

Eni included in Euronext's new MIB® ESG index, based on environmental, social and governance best practices

San Donato Milanese (Milan), October 18, 2021 - Eni has been included in the MIB® ESG, the blue-chip index for Italy dedicated to ESG best practices launched by Euronext and made operational by V.E, part of Moody's ESG Solutions.

The index includes the most important listed Italian issuers that demonstrate to apply best practices in ESG and was developed according to a methodology shared with the financial community, public and regulatory authorities.

Eni's Chief Executive Officer, Claudio Descalzi, said: "This is a further important recognition by the financial community of the strategic plan developed and implemented by Eni, which pursues ESG best practices in a concrete, structured and effective way, and which will lead us to net zero emissions of industrial processes and products by 2050, positioning us as a leading company in the production and marketing of decarbonised products".

Eni has progressively expanded its ESG approach, integrating these themes into its mission and governance model, business strategies, operational approach and reporting.
