Sáasken

In February 2020, Eni made a new oil discovery on the **Sáasken** Exploration Prospect in **Block 10**. It is located about 65 kilometers off the coast, in a water depth of 340 meters. The discovery was appraised by a second well drilled by Eni Mexico in 2021, confirming the volumetric estimation in the range of **200 million barrels of oil in place**. Upside potential is present nearby.

Sayulita

In August 2021, Eni made an additional oil discovery in **Block 10** on the **Sayulita** Exploration Prospect, located just 15 km away from the previous oil discovery. Data analysis indicates that the new find may contain between **150 and 200 million barrels of oil in place**. Evaluations are ongoing to identify synergic development opportunities in the area.

Yatzil

In March 2023, Eni made a new oil discovery on the **Yatzil** Exploration Prospect in **Block 7**. It represents Eni's eighth successful well drilled in the basin. The discovery is located 25 to 30 kilometers away from other discoveries. According to preliminary estimates, the discovery may hold **more than 200 million barrels of oil in place**.

Saasil

In May 2024, Eni made a new oil discovery on the **Saasil-1** Exploration Prospect in **Block 10**. It is located approximately 65 kilometers off the coast, in the mid-deep water of the Cuenca Salina in the Sureste Basin, offshore Mexico. The new finding may contain around **250-300 million barrels of oil in place**.

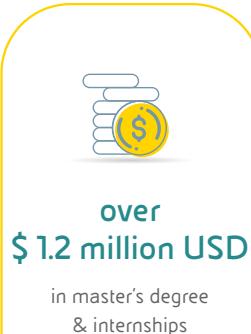

Yoopat

In July 2024, Eni made a new oil discovery on the **Yoopat-1** Exploration Prospect in **Block 9**. It represents Eni's ninth successful well drilled in the basin. The discovery is located approximately 63 kilometers off the coast, in the mid-deep water of the Cuenca Salina in the Sureste Basin, offshore Mexico. The preliminary estimates indicate a discovered potential of around **300-400 million barrels equivalents of oil and associated gas in place**.

universities

Eni: an integrated energy company on a journey to net zero emissions by 2050

Eni is a global integrated energy company engaged in the entire energy chain around the world: from exploration, development and extraction of **oil and natural gas**, to the generation of electricity from cogeneration and **renewable sources**, traditional and biorefining and chemicals, and the development of **carbon capture and storage project** (CCS).

Eni aims to achieve net zero emissions (Scope 1, 2 and 3) and net zero carbon intensity by 2050.
