the line of lubricants  
that makes driving even more enjoyable

eni

[eni.com/na](http://eni.com/na)

the six-legged dog,  
a strong link between present and future

In 2009 eni launched a brand streamlining process aiming to achieve clear identification and higher efficiency of its logo. The evolution and improved consistency of eni's image involves 70 countries and numerous sectors in which the company operates. eni has reached its visual identity and intends to align it to its new role as a 360-degree energy company whose offering includes fuels, electric power and gas.

Today, eni is an open and dynamic company. Its key values are sustainability, culture, partnership, innovation and efficiency. In line with these values, the updated logo developed by eni maintains the continuity elements that have characterized it until now, while emphasizing the spirit of a constantly evolving, integrated company that pays attention to the territory and entertains relations with all its stakeholders.

Now available, the first line of **eni i-Sint** passenger car lubricants is the result of Agip experience and tradition combined with eni research and leading edge technology.

# i-Sint

eni i-Sint, **the line**  
of automotive lubricants  
**from eni**

Each engine needs the right lubricant to protect it and enhance its performance. **eni research has developed eni i-Sint**: the line of lubricants designed for your car's needs.

**eni i-Sint** is a full range of synthetic, semi-synthetic and mineral oils formulated on the basis of the requirements and potential of any type of motor under all conditions of use.

Through higher durability and fluidity, **eni i-Sint** high-technology lubricants represent a whole new way of thinking about driving. Thanks to a careful selection of raw materials and an accurate balancing of all components, **eni i-Sint** products have successfully passed strict testing protocols and qualified at the highest levels established by organizations and automotive manufacturers.

**eni i-Sint** lubricants ensure maximum engine protection and performance, and improve the performance of anti-particulate filters through the use of special additives (eco-friendliness). The range also includes more low viscosity lubricants that help to reduce fuel consumption (fuel economy).

A **high-performance** synthetic engine oil formulated to meet the needs of **modern** gasoline-fueled engines.

## i-Sint XL

i-Sint lubricants, intended for the lubrication of most vehicles currently in circulation, are highly reliable under all operating conditions and for all types of cars, from small compact cars to sports models.
